

This activity encourages you to think about energy use.

### Task 1

Read the following statements, then cut and paste them into the correct column within the table.

Always run dishwashers and washing machines when they are only half full.	Buy lower graded appliances, such as fridges, freezers, dishwashers and washing machines.
Wash clothes on a 30 degree cycle and hang washing outside to dry.	Invest in an LCD or plasma screen television.
Fit PV solar panels.	Leave all appliances on stand-by.
Buy food that is protected by lots of packaging.	Take holidays closer to home.
Turn off the lights when leaving a room.	Make sure the kettle is filled to its maximum capacity before you boil it.
Use the car for all journeys.	Bleed radiators to get trapped air out of them.
Always run the heating at the maximum temperature on the thermostat.	Leave curtains wide open.
Attach a cover to the hot water tank.	Invest in the latest light bulbs and fittings.
Avoid cavity-wall and loft insulation at all costs.	Fit double-glazing throughout the home.
Use strips of rubber around doors and windows.	Use individual electric heaters to warm each room.

### Task 2

Design a poster to inform householders about ways they could conserve energy. Consider who your target audience is and how you might grab their attention.

Increases energy use	Reduces energy use

## Answers:

Increases energy use	Reduces energy use
Always run dishwashers and washing machines when they are only half full.	Wash clothes on a 30 degree cycle and hang washing outside to dry.
Buy food that is protected by lots of packaging.	Fit PV solar panels.
Leave curtains wide open.	Turn off the lights when leaving a room.
Use individual electric heaters to warm each room.	Fit double-glazing throughout the home.
Leave all appliances on stand-by.	Invest in the latest light bulbs and fittings.
Buy lower graded appliances, such as fridges, freezers, dishwashers and washing machines.	Bleed radiators to get trapped air out of them.
Invest in an LCD or plasma screen television.	Take holidays closer to home.
Make sure the kettle is filled to its maximum capacity before you boil it.	Use strips of rubber around doors and windows.
Use the car for all journeys.	Attach a cover to the hot water tank.
Always run the heating at the maximum temperature on the thermostat.	
Avoid cavity-wall and loft insulation at all costs.
