

Task

For each pair of linked keywords write a sentence including them both.

For example:

1.

1.	
2.	
3.	
4.	
5.	
6.	
7.	
8.	
9.	
10.	

Teaching notes

This activity is ideal as a quick starter to recap and link keywords from any topic. Add thirteen keywords to the boxes and give an example of a sentence that uses two keywords.

Ideas for differentiation:

- allow free choice to pair different keywords together
- ask students to link more than two keywords together
- change the links between keywords to make them more straightforward or challenging.
